

## CIRCULATION: DRIVING TOWARD BETTER HEALTH

### WHAT

Circulation is a transportation service used to connect individuals with social care services that address basic needs. This product is a direct response to the growing body of research demonstrating that addressing social determinants of health (i.e. transportation) more effectively in underserved communities can improve health while lowering costs. Please complete this [survey](#) if your organization is interested in joining!

### WHY

Medicaid benefits only cover transportation for medical services. Alliance has identified a need for transportation to non-medical services that address social determinants of health and meet social needs. When this happens, individuals are more likely to seek and maintain preventive medical activities, reducing the frequency of emergency department visits and hospital admissions that cost our health system billions every year.

### HOW

### BACKGROUND

Alliance and Better Health for Northeast New York (BHNNY) have partnered to provide Circulation services to eligible Medicaid recipients. Healthy Together, a referral management platform, simplifies and streamlines social determinants of health-focused referrals between medical, behavioral and social care providers to improve health. In order to use Circulation, Alliance Users must be part of the Healthy Together Network.
