

# PLEASE, HAVE PATIENCE.

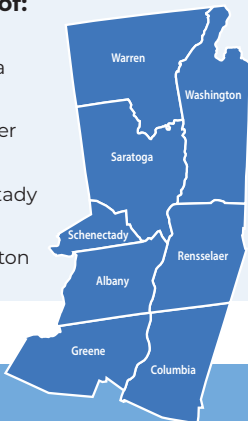

Our region will receive more vaccine every week, and, in the coming months, we will have enough to vaccinate everyone.

We are all eager to receive the COVID-19 vaccine, particularly as New York State expands eligibility. The Capital Region Vaccine Network is working closely with our county, hospital and community partners to ensure safe, equitable and efficient distribution of the vaccine.

**But, at this point, doses of the vaccine are limited.** Appointments will be available when the Vaccine Network receives more doses from the state, which receives vaccine from the federal government.

## Vaccines will be administered in various locations in the counties of:

Albany  
Columbia  
Greene  
Rensselaer  
Saratoga  
Schenectady  
Warren  
Washington

## We urge you to have patience and know that:

- As developments continue to unfold rapidly, you can find up-to-date information at **CapitalRegionVAX.org**. It has important information about who is eligible and when, as well as information on the vaccine itself.
- Eligible New Yorkers may schedule their appointments at 1-833-NYS-4-VAX (1-833-697-4829) or by using the Am I Eligible tool, found at **CapitalRegionVAX.org**.
- Appointments may be scheduled up to three months out.
- Please do not go to vaccination locations without an appointment. Only those with a scheduled appointment will be vaccinated.
- The vaccine has been approved by the FDA and CDC. It is safe, it is free and it will be available soon.

**Please have patience—and when the time comes: Don't Hesitate. Vaccinate. Together, we will end the pandemic.**
